

# Allflex® Tissue Sampling Unit (TSU)

PRESERVING A WEALTH OF GENETIC INSIGHTS

## ALLFLEX® TSUS ARE YOUR CONVENIENT GATEWAY INTO GENETIC IMPROVEMENT

- One quick squeeze of the Allflex® TSU Applicator deposits a clean DNA sample into a liquid preservative.
- Inside that vial resides a wealth of genetic insight on that animal's pedigree and potential impact on future progeny.
- Combined with your expertise, DNA testing can help speed progress on goals and fill your herd with superior cattle.

## BETTER INSIGHTS HELP DRIVE BETTER HERD MANAGEMENT DECISIONS

DNA reports help you firm up the decisions that can influence success in herd improvement. Is a calf a true progeny of a sire? Are all the bulls doing their job? Which heifers should be kept in the breeding herd? What are the best sire genetics for your herd? How do cows score on indexes?

## FASTER, CLEANER AND EASIER - A GOOD TEST BEGINS WITH A GOOD DNA SAMPLE

Allflex® TSUs are fast, easy and effective. They help prevent cross contamination or messy sampling errors common with blood or hair.

# Streamlining your use of production records

## MAKING TISSUE SAMPLING MORE CONVENIENT

With TSUs you can take samples when processing cattle and decide later about lab testing. For record keeping, each sterile vial is individually numbered and barcoded for storing samples, ordering tests or comparing DNA test results to other animal information.

The TSU Applicator deposits a tissue sample into the sterile vial for fast, clean, easy DNA sampling.

## MATCHING TSU VIALS WITH OTHER FORMS OF ANIMAL ID

You can purchase matched sets linked by the same identifier number on a TSU, EID or visual tag. Matched sets make it easier to link animal ID numbers to production or progeny records.
